Office Action Summary

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-18, drawn to a method for plasma processing using reflective light detection of contaminants on chamber walls or suspended in the chamber, classified in Class 427, subclass 8 or 569.

II. Claims 19-35, drawn to a plasma apparatus with reflective light detecting means aimed at the wall or suspended material, classified in Class 118, subclass 663+ or 723R+.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used for different processes, such as to sense the material of the wall or the wall liner, instead of contaminants, or to sense/detect suspended coating material instead of foreign material.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as

Art Unit 1762

shown by their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, or vice versa, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Melvin Kraus on 6/3/03 to request an oral election to the above restriction requirement, but did not result in an election being made. As of 6/12/03, no election had been received by the Examiner, hence this restriction requirement is being mailed.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of

Serial No. 10/075,244

-4-

inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication should be directed to M. L. Padgett from Monday through Friday from about 8 A.M. to 4:30 P.M. at telephone number (703) 308-2336 and FAX #703 872-9310 (official), 872-9311 (official after final) and 305-6078 (unofficial).
